Summary

Aspiring Software Engineer with hands-on experience in React.js, Node.js, FastAPI, and Python. Skilled in building RESTful APIs and full-stack web applications, with experience integrating LLM APIs for AI-based features. Strong understanding of frontend development, backend services, and database management, supported by real-world project experience using modern web technologies.

Skills

Programming & Scripting: Python, JavaScript

Frontend Technologies: HTML, CSS, Tailwind CSS, React.js

Backend Technologies: FastAPI, Node.js, Express

Databases: MySQL, MongoDB, SQLite

APIs: Built REST APIs using Express.js

AI/LLM: LLM APIs (Gemini/OpenAI/Grok), Prompt Engineering

Projects

Trade Opportunities Analyzer | [Link](#)

- Developed a backend system to analyze stock **trading opportunities by sector**.
- Built REST APIs using **Node.js**, **Express.js**, and integrated **MongoDB** for storing trade and sector data.
- Implemented sector-wise analysis endpoints to retrieve and filter trading opportunities.
- Designed scalable backend architecture with **MVC structure** and modular API routes.
- Tested APIs using **Postman** and ensured proper request-response validation.
- Integrated with frontend dashboard for sector-based market insights.

Full-Stack Task Management Application | [Link](#)

- Built a **full-stack Task Manager Web Application** using React (Vite), Tailwind CSS, Node.js, Express.js, and MongoDB, enabling efficient task management with a responsive user interface.
- Implemented **secure authentication and authorization** using JWT and bcrypt, ensuring protected routes and user-specific data access.
- Developed and integrated **RESTful APIs** to perform CRUD operations on tasks, structured using Express.js and Mongoose for scalable backend architecture.
- Managed frontend-backend communication using Axios and performed API testing with Postman, demonstrating strong understanding of client-server architecture.

Password Generator Web App | [Link](#)

- Developed a responsive password generator application using React.js.
- Implemented logic to generate **secure random passwords** based on user preferences (length, character types).
- Designed and styled UI for seamless user interaction and dynamic clipboard copy functionality.
- Utilized React state management and event handling for real-time updates.
- Configured project build and development tooling with Vite for fast module bundling.

Education

B-Tech in Computer Science

NRI Group of Institute Bhopal (M.P)

Graduate: 2021 – 25

7.60 : CGPA
